

National Highways Traffic Flow

Traffic volumes collected from four key sites on England motorways, including Speed, and Time of Day. The data highlights the total monthly volume for May 2024, with figures of 221k, 221k, 286k, and 168k at the different sites. This information is crucial for understanding traffic patterns and planning improvements.

The data is part of the National Highways Traffic Flow project, which aims to monitor and enhance traffic management across the country. By analyzing this data, we can identify trends and make informed decisions to improve road safety and efficiency.
